To Whom It Concerns.

This is to certify that we have been using TSG-Radplan Computerised Treatment Planning system of M/S TSG – Integrations since Sept.1995.

To date, the system has proved to be robust both in terms of software- hardware as well as for variety of clinical situations- both External Beam as well as Brachytherapy,(including Templates). There has been negligible down time in these last 5 ½ years and the service support has been efficient and timely.

Being an ISO-9002 Quality Standards certified Cancer Centre, we carry out regular Quality Assurance Tests and have found the system to meet international standards.

Prof. G Kilara
