Performance Report of TSG's ASHA 3D Radiotherapy Treatment Planning System

The ASHA 3D Radiotherapy Treatment Planning System was installed in this department in May, 2002 and since then the system has been working satisfactorily. This system is the first indigenously developed 3D treatment planning system in this country. The installation work got completed within 4 days time. The services provided by the firm were found to be satisfactory and the firm has fully trained service engineers to take care of any kind of servicing requirements.

We are fully satisfied with the functioning of ASHA 3D-TPS.
